AIRFLOW VENTILATING RECOMMENDATIONS CLOSED SOFFIT CABINET

Depth of cabinet must be less than 25" (63.5 cm).
Height of soffit must not exceed 84" (213.3 cm).
Following illustrations explain the cabinet construction (soffit and rear wall positions) required for optimum ventilation and airflow.

Front View

Grey arrow = ambient air; Black arrow = warm air
Cabinet depth 25" and soffit located at 84", Cabinet depth more than 25" and/or soffit located at more than 84", causes air gap at back of refrigerator. Efficient cooling is achieved, and/or top of the refrigerator. Air gap allows warm air recirculation causing loss in cooling efficiency.

If your opening does not meet these requirements you will need to make modifications.
