## FOR THE WAY IT'S MADE.

PRODUCT MODEL NUMBERS

## KRFC302E

Electrical: A 115 volt, 60 Hz , AC only 15 - or 20 -amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator and approved accessories be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.
Water: A cold water supply with water pressure of between 35 and 120 psi ( 241 and 827 kPa ) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

## Reverse Osmosis Water Supply:

IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi ( 241 and 827 kPa ).

## LOCATION REQUIREMENTS

IMPORTANT: This refrigerator is designed for indoor, household use only.
To ensure proper ventilation for your refrigerator, allow for $1 / "(1.25 \mathrm{~cm})$ of space on each side and at the top. Allow for 1 " $(2.54 \mathrm{~cm})$ of space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave $2^{1 / " ~}(6.3 \mathrm{~cm}$ ) minimum on the hinge side (some models require more) to allow for the door to swing open.
NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of $55^{\circ} \mathrm{F}\left(13^{\circ} \mathrm{C}\right)$ to a maximum of $110^{\circ} \mathrm{F}\left(43^{\circ} \mathrm{C}\right)$. The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between $60^{\circ} \mathrm{F}\left(15^{\circ} \mathrm{C}\right)$ and $90^{\circ} \mathrm{F}\left(32^{\circ} \mathrm{C}\right)$. It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.
