## FOR THE WAY IT'S MADE.

## PRODUCT MODEL NUMBERS

## KRFF300E

Electrical: A 115 volt, $60 \mathrm{~Hz} ., \mathrm{AC}$ only 15 - or 20 -amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.
Water: A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa ) is required to operate the water
dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.
Reverse Osmosis Water Supply:
IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and
$120 \mathrm{psi}(207$ and 827 kPa$)$.
If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi
(276 to 414 kPa ).

## LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a $1 / 21$ " $(1.25 \mathrm{~cm})$ of space on each side and at the top. Allow for a $1^{\prime \prime}(2.54 \mathrm{~cm})$ space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave a 2 " $(5.08 \mathrm{~cm}$ ) minimum space between the refrigerator and wall to allow the door to swing open.
NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of $55^{\circ} \mathrm{F}\left(13^{\circ} \mathrm{C}\right)$ to a maximum of $110^{\circ} \mathrm{F}\left(43^{\circ} \mathrm{C}\right)$. The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between $60^{\circ} \mathrm{F}\left(15^{\circ} \mathrm{C}\right)$ and $90^{\circ} \mathrm{F}\left(32^{\circ} \mathrm{C}\right)$. It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.
