### Reverse Osmosis Water Supply

**IMPORTANT:** The use of a reverse osmosis system with this product is not recommended. However if you do use reverse osmosis, follow these instructions.

**IMPORTANT:** The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the ice machine needs to be between 30 and 120 psi (207 and 827 kPa). If a reverse osmosis water filtration system is connected to the cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).
